## COURSE DESCRIPTION

The program will consist of lectures, case presentations and discussions designed to provide pathologists with a special interest in cytopathology, pathologists-in-training and cytotechnologists with an in-depth discussion of current criteria and changing concepts in Diagnostic Cytopathology. Course materials will be provided at the course.

## STATEMENT OF NEED

Diagnostic cytopathology performs a vital role in the evaluation and treatment of patients with non-neoplastic and neoplastic disease. This course is needed to advance the specialized knowledge of practicing cytologists and further, to encourage the exploration of current approaches and concepts in classification, differential diagnosis and management. It is designed to provide updated practical, problem-solving knowledge and information for cytopathologists, pathologists, residents and cytotechnologists.

## COURSE GOALS AND OBJECTIVES

The objective of any CME program is to improve patient care. Upon completion of this course, participants will be able to:

- Better understand the cytologic evaluative criteria for various non-neoplastic and neoplastic disease entities
- Specify and avoid problems and pitfalls in cytopathology
- Recognize the utility of ancillary techniques
- Understand the unique management schemes in gynecologic and non-gynecologic cytology

## TARGET AUDIENCE

Cytopathologists, pathologists, residents and cytotechnologists.
